Here are some funny shapes! I cut them out of the number grid to make a puzzle. But then my pet dog licked off some of the numbers. Can you look at the grid and fill in the missing numbers?

Here are some more funny shapes! I cut them out of the number grid to make a puzzle. I put them in my pocket. But then I forgot to take them out. The pieces got washed with my *kurta*. Some numbers got erased. Can you look at the grid and fill in the missing numbers?

By now, you know what to do! Fill in the missing numbers in these puzzle pieces that are part of the number grid. This time, try doing it WITHOUT looking at the grid.
